

I signed on with XM radio last month. I am an OTR Trucker. And I purchased it for not only entertainment but for the traffic and local weather reports for the cities I travel too. This is a valuable tool. In a day and age where State and Federal Government are imposing new laws on distracted driving. With this I don't need to scan thru the stations to wait for or find a traffic and weather report. Not to mention how much fuel you waste sitting in a traffic jam. Think about it?
